

Langley Boom Lift Operator Training

Langley Boom Lift Operator Training - The cherry picker work platform is a kind of work platform, which would typically consist of a bucket or platform at the hydraulic lifting system's end. The machine is likewise referred to as a man lift, boom lift, hydaladder or basket crane.

The platform or bucket is sometimes set onto or mounted to a truck or other motor vehicle and is occasionally called a bucket truck. Other motor vehicles that could be made use of are self-moving platform, stand-alone trailers or flat back pickup vans. The worker stands in the bucket and works from there. The person in the bucket normally includes an upper set of controls enabling manipulation of the bucket's position. The reach of the bucket could be extended on some models by telescoping to be able to adjust the lifting arm. Automatic safety controls prevent tipping. Articulated boom lifts are recommended when it is needed to clear obstacles or for working in tight spaces.

As the name implies, cherry pickers were made for picking fruit in trees at high levels. Cherry pickers are used in various other industries, such as mining, exterior painting and construction. Occasionally they are used for cleaning windows on high building. The machines are used to service telephone, cable television and electrical equipment on utility poles. At times, firefighters make use of cherry pickers, called snorkels, when ladders are insufficient. At Christmas time, civic workers could be seen inside cherry pickers hanging lights and banners.
