

## Langley Warehouse Forklift Safety Training

Langley Warehouse Forklift Safety Training - Companies normally face liability for injuries and damage sustained in workplace accidents. Warehouses could be hazardous places to the people who work there. That is why employee safety is a top priority for lots of companies. Warehouse safety training is one of the most effective methods to protect workers, while minimizing expenses connected with accidents and injuries.

The warehouse holds large amounts of materials and stock that may pose dangers, specially when these are being transported. The moving of stock with a powered equipment or by hand could lead to injuries the employees' fingers, hands, toes and feet. Falling, slipping and tripping are common causes of injury. Heavy things could fall off shelves and harm workers. Forklifts and other machines carry inherent risks because they manipulate heavily laden pallets. Incorrect lifting is a common source of back injuries. Even nails, splinters and box cutters can result in harm.

Warehouse conditions could change from one minute to the next, depending on the materials or substances being handling, the tasks being performed and the machine being used. Due to the wide variety of possible hazards in warehouse environment, warehouse operations are regulated by many various standards. There are regulations for storage and material handling, for walking and working surfaces, and rules governing the use and selection of PPE (personal protective equipment).

Lots of warehouse safety rules are common sense. Here are a number of examples of warehouse regulations all employees should be familiar with:

1. Safety is a priority at all times if working in a warehouse.
2. PPE, such as gloves, safety shoes, eye protection and hard hats, should be worn as appropriate.
3. Possible hazards must be inspected and reported.
4. Observe and Follow warning signs and signals.
5. Watch where you're going and focus on what you're doing.
6. Pay attention to the work that others are performing nearby, particularly when they are working with forklifts and other hazardous machinery.
7. Stack and store materials so that they're stable and secure.

Following good housekeeping regulations would help to ensure a safe warehouse for all employees. Essential housekeeping regulations include keeping floors and aisles clear of objects, like wires and cords. Never perch objects insecurely on a surface. When spills happen, clean up at once. Dispose of garbage in proper containers. Keep sprinklers, fire exits and fire extinguishers accessible. Put box cutters and other sharp tools away soon after use. Report tripping hazards like for example loose or damaged flooring.
