

Langley Manlift Operator Certification

Langley Manlift Operator Certification - Our scissor platform and aerial lift training and certification empowers those participating with a knowledge and general understanding of the safe and efficient utilization of "Power Operated Mobile Work Platforms," under all of the current regulations in the industry. Upon successful completion of training, the participants will be able to know and understand certain health and safety related dangers associated with using scissor and aerial lifts.

There is likely numerous institutions that provide individuals in your area with manlift operator certification courses. The trainee would receive in-depth instruction about the safe utilization and rules in addition to field training. The skill level and knowledge of each and every person training is evaluated and people who could demonstrate a satisfactory level of operational ability will be given employee documentation and Operator Certification cards.

Theory Training

The trainer guides those training through a comprehensive and interactive review in the theory training. The operator course book is studied which includes all applicable regulations. Other topics like safe operating measures, various equipment kinds in addition to different sizes and associated applications, pre-use checks and general work place safety are explored individually.

Theory Evaluation

The Theory Evaluation begins with a written test based upon the concepts included in the operator's reference manual. These tests are graded and returned to the ones training. After that the exams are reviewed to ensure understanding and a score of at least 70% is needed in order to pass this part of the training.

Practical Training

The hands-on part of the course is included in the practical training. Here, trainees are shown the safe operating measures, the parking and shutdown procedures and the pre-use inspection measures. Every trainee has the chance to operate the machinery and practice the skills they learned throughout Theory Training under the course trainer's helpful eye in an environment that is safety controlled.

Practical Evaluation

The Practical Evaluation is where the trainees are assessed to assure they have reached a minimum level of skill. The trainees are then assessed on an individual basis using the machine in a reasonably challenging course setting. As soon as the evaluation is done, the ones training are de-briefed and given the opportunity to address any problems they may have regarding whichever part of the program. Each and every successful trainee's employer will be given the official records and documents shortly after the program has been completed.
